Each issue, we take a look at some of the big stories from history – from the World Wars and the wives of Henry VIII, to the destruction of Pompeii and the terrors of the Black Death – telling you everything you need to know about the subject, with stunning imagery and fascinating trivia and facts.

We also explore the lives of the 'big names' in history such as Gandhi and Einstein, go adventuring with explorers like Cook and Columbus, and march with Greek warriors to find out how wars were really fought. *BBC History Revealed* puts readers in the thick of the action, re-living historical events and establishing the key facts - but always in a fun, accessible way that can be enjoyed by the whole family.
